## RightDose Group Adds National Protocol Medications to Database

PALS, NAEMSP, NAEMSP, EMS Solutions and Broselow Tape Added to National Database

**Franklin, TN** - May 24, 2016 — The RightDose Group, manufactures of the RightDose™ Pediatric & Adult Drug Dosing guide announce today they enhanced their Mater Drug Database to include medications from several national EMS protocol lists.

Medications used in Pediatric Advanced Life Support (PALS), National Association of EMS Physicians (NAEMSP), National Association of State EMS Officers (NASEMSO) and EMS Solutions protocols were added. In addition, medications used on current and previous Broselow tapes were added to the database.

“These additions”, states RightDose representative Bob Steele, “simplifies the process of clients adding drug doses, concentrations and other information used to create their custom medications list”. RightDose uses the personalized medications list to produce a custom dosing guide, which pre-calculates all weight-based doses, or to feed the exact weight and drug dose information to their mobile platforms.

“Although clients are able to easily customized any drug they select from our Mater Drug Database before entering it into their organizations medications list, we were able to populate the most common concentrations for each drug based on information from our client database.” explained Steele.

Created in 2009 by paramedic Michael Wallace and located in Franklin TN, our passion is to protect children and caregivers from pediatric medication errors common in the prehospital (EMS), hospital (ED) and clinical care environments by providing pre-calculated mL level dosing solutions. We deliver the most cost effective, easy to use dosing guides and mobile dosing applications available, crafted by personalizing the customer’s standard treatment protocols and medications. Our mission is to eliminate the math and resulting errors that traditionally occur when calculated at the point of care. Learn more about sharing our passion at [www.rightdose.net](http://www.rightdose.net).
